One touch
to access
all functions

Treatments

- Remote updating with new Treatments
- Research per Area, Technology, Type or Applicator
- Instructions with pictures and video for each Treatment
- Precautions and contraindications per Treatment
- Optimal cycle for Treatments
- Associated products (cosmetics and consumables)
- Print information for the Client
- Selection of "favourites" for frequent Treatments"

Management

- Planning of appointments for the Spa
- Details name, treatment, time, date, notes, duration
- Drag&drop function to change appointments
- Visualisation and printout of the calendar
- Weekly, daily, monthly and timeline mode
- Configuration of time and days of work for the Spa
- Purchase management and history
- Management of Spa price list

Test

- Remote updating with new Tests
- Only one interface for all executable tests
- Research per Area, Technology, Type or Applicator
- Instructions with pictures and video for each Treatment
- Products associated to each Test
- Select as "favourites"
- Print Test results with the name of the Client
- Customised printouts with the name of the Spa

Clienti

- Management of Client information
- List and detail view of the schedules
- Rapid research from the schedule
- Registry of Treatments executed for Clients
- Memorandum of Treatments to be executed
- Case history with field for notes and contraindications
- Information saved on the Client's Smart Card
- Printout of Client list or schedule

Training

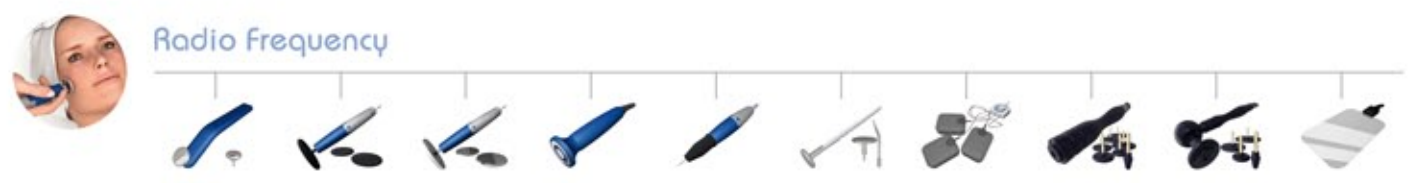

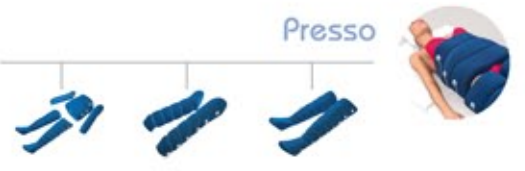

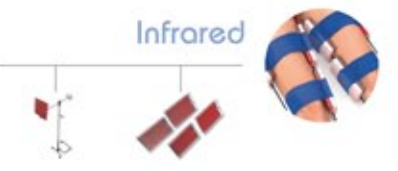

- Technologies Dictionary
- Scientific Dictionary for Technologies
- Types Dictionary
- Dictionary for the safety symbols associated to the Applicators
- Dictionary of the contraindications
- Contraindications with description and OMS code
- Test to verify learning from the course
- E-Learning method for the achievement of certificates

Store

- General catalogue of the products associated to the Treatments
- List of categories: Cosmetics, Applicators, Accessories, etc.
- Description and picture of available products
- Memorandum to remember the products to buy
- Basket for the simple and intuitive purchase of Products
- Verify the availability of the products in real time
- Management of purchases based on quantity and discounts
- Payment choice and shipping

WANA beauty system

A machine complete with all of the technologies integrated. To activate just connect the specific applicator* and choose the treatment.

*The applicators can be purchased separately based on your needs.

Integrated training

A picture is worth a thousand words, therefore **UNNA**, other than describing every Protocol of the Treatment Procedure and Technology in detail, demonstrates with a **video and clear and effective pictures**: how to correctly hold the applicator; the areas to be treated and those to be avoided; how to perform the movements and where to position the applicators. The videos can be expanded to full screen for better viewing or to be shown to Clients.

Multi channel and Multi treatment

UNNA has more than one output channel which are separately controlled. It is possible to perform treatments that are different in terms of Technology and Type and it will warn that they are incompatible or dangerous amongst each other. Thanks to **independent output channels**, in the case of malfunction, another channel can be used to perform the same treatment and avoid interruptions.

Modular

UNNA is the first interchangeable modular system. When new technologies are introduced they are simply integrated by installing new Modules and updating the Treatments. In this way it is possible **to always be up to date while maintaining contained costs**. Thanks to this patented technology, in the case of malfunction, the modules can be easily removed and replaced directly by the operator, **without the intervention of external assistance**.

UNUN beauty system

TECHNICAL CHARACTERISTICS

Model	UNA BEAUTY v.1.0
Purpose	For AESTHETIC AND NOT MEDICAL USE Professional use - NOT Residential
Classification	Class I type BF
Size	Width: 41,5 cm Depth: 34 cm Height Closed: 22,5 cm
Power Supply	Tension: 100-240Vac (47-63Hz) Power: 300 W 10 A
Certifications	CE Certificate Regulation 62-39 Power Supplier Safety EN 60601-1
Power of Technologies	All of the technologies are configured to not exceed the maximum Levels provided by the Regulations of the Sector.
Characteristics	12" colour reclining Touch Screen Display Connectivity: WIFI, LAN, Internet Key (USB) Smart Card Reader Access with Protection Card Self diagnosis of modules, applicators, systems Notice of expiry of certificates Remote updating Exportation and back-up of information Universal Connectors with recognition Calibration of integrated applicators

 Made in Italy

CLINICAL TESTS

43 Clinical Tests, created by leading Universities, Research Centres and Doctors, demonstrate the efficacy of the Technologies Integrated in UNUN which is one of the machines with the most Clinical Tests present on the market.
